

ORMUS

WHITE POWDER GOLD

Lecture and Workshop with Barry Carter

The Ormus elements are the precious metal elements in a natural non-metallic form. In this form they are much more common than they are in their metallic form. There is strong evidence that the Ormus elements are nutritional minerals which are essential to all life. People tell stories of remarkable recoveries from a variety of diseases subsequent to eating the Ormus elements in a concentrated form.

These elements also exhibit strange properties. Sometimes they disappear, levitate or pass through solid objects. They seem to be related to the ancient alchemical materials. They have been linked to the Biblical manna, shewbread, King Solomon's gold and the Egyptian mftz discussed by Laurence Gardner in *Lost Secrets of the Sacred Ark*. Ancient Hindu and Chinese texts mention similar materials with similar properties. Many people claim that the Ormus elements have psychic or spiritual benefits.

The Ormus elements have been extracted from the air, water and the ground. Their relative abundance makes them quite easy to extract and concentrate using relatively simple chemical and mechanical methods.

In his presentations, Barry discusses all of the above concepts and more. He also demonstrates simple methods for extracting the Ormus elements from natural sources. Barry has been working with Ormus elements since 1989 and gives lectures on Ormus world-wide.

Visit Barry's Ormus website at www.subtleenergies.com.

Barry will be offering presentations in Kingston, Washington:

Free Lecture:	Friday, May 14th, 7:00 - 9:00
Workshops:	Saturday, May 15 th , 10:00 – 5:00, \$50
	Sunday, May 16 th , 10:00 – 5:00, \$50
	Both workshops: \$75
